

## In my community

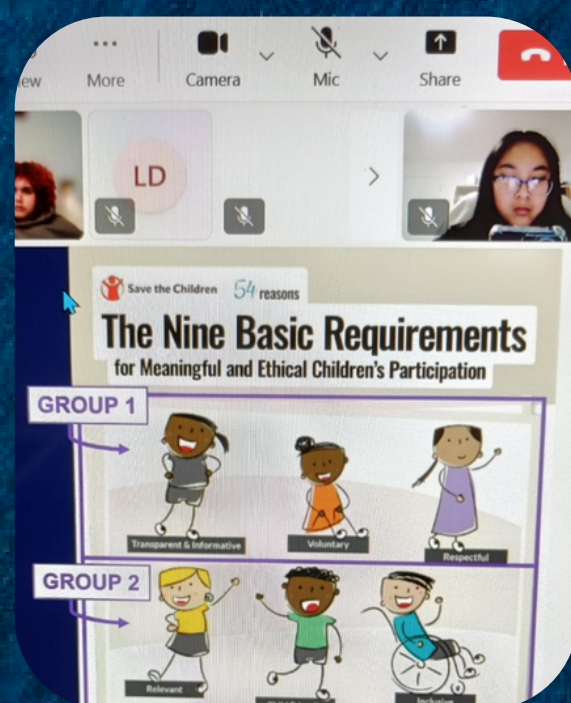

### YAC

As a member of the WTC YAC council, I showcase my leadership through communication, empathy, and courage, all of which are crucial leadership qualities.

When the youth festival was planned, each member managed their own carnival game. Responsibility and reliability in situations like this constitute a great portion of the values required to be a successful leader.

### YNOT Steering Group

With a position on the YNOT Steering Group, I work with youth from all areas of Tasmania to put together a guide on how to ethically and effectively involve young people in decision making. Each month, we come together to discuss topics within youth voice and serve as advocates for fair children's participation, which will be published and used to educate DECYP staff.

# Me as a leader

Leadership role/council positions since 2023

2023- Core Leader

2024- Year 7 Council

2024- STEM Racing Head of Engineering

2025- YAC

2025- YNOT Steering Group

2025- Year 8 Council

2025- STEM Racing Head of Engineering

## In my school

### STEM Racing

The STEM Racing competition is a global event focusing on engineering and enterprise. Students work together to present portfolios, cars, brands, and booths to showcase their progress.

I have been a part of this competition from 2023-2025, during which our team has won the state finals and placed 4<sup>th</sup> in the national finals.

I am the manager of the engineering department for my team, overseeing several tasks within the department. This showcases my leadership within a team, and presents me as someone who manages work effectively to meet tight deadlines.
